

Release Notes 26.0

FEATURES

New authentication capability

Users can now configure single sign-on for their organisation.

Available in version 26.0.

Dashboard customisation

Widgets on the home dashboard can be rearranged and resized.

Applies to all plans.

FIXES

Resolved an issue with billing calculation

The monthly total was incorrect when proration applied mid-cycle.

Reported in 25.9.

BUGS

Application crashes during export

Large datasets cause the export process to run out of memory.

Workaround: export in smaller batches.
