

Release Notes 26.1

Features

Multi-factor authentication support

Accounts can enable MFA using an authenticator app or SMS code.

Rolled out gradually in 26.1.

Export to spreadsheet

Reports can be exported directly to a spreadsheet format.

Beta feature.

Faster search indexing

Search results now update within seconds of a change.

Fixes

Fixed billing calculation error

Corrected rounding when discounts and taxes were combined.

Follow-up to 26.0.

Login redirect loop resolved

Some users were stuck in a redirect loop after signing in.

Bugs

Export crash with large datasets

Exporting very large reports can still terminate unexpectedly.

Under investigation.
